01.Motivation & Power of vim

Thursday, March 19, 2026 8:34 PM

vi 'file' opens a file with vi
nvim 'file' opens a file in neovim
vim 'file' opens a file with vim

Neo Vim - highly customizable
- can set up key bindings that make you a lot faster

Neovim commands can be also used in other IDEs (it is not mandatory to stick to it), but, as itself, it is highly customizable and allows for an extreme improvement of the workflow.
