00.Sourcing Code

Sunday, March 15, 2026 3:38 PM

source file – use the file as a library
↳ same as .
-p to specify a $PATH style path
! the code in source will be always executed when imported

```
if ! (return 2> /dev/null); then
fi
```

=> only executes the code if it is run directly (not via source)
