06.Macros and Registers

Thursday, March 19, 2026 8:34 PM

:reg list all registers
"n p paste from the nth register
"n y y copy line in register n
"+ special register that represents the clipboard
"0 special register that stores the last thing actually copied (y/yy)

Macros are also stored in registers
↳ a sequence of vim bindings or actions

q char start recording macro char
q quit recording
"char register where the macro is stored
@ char execute macro
