

# 01.Date Formatting

Sunday, March 15, 2026

3:38 PM

`date` prints current date

`date +%Y.%m.%d` gives a specifier for the date-`strftime`

`printf 'date is %Y/ %m/ %d) T\n'` print date  
format string  
-1 current date  
-2 shell start date  
0 and above epoch time

`printf '%Y.%m.%d) T\n'` print current epoch  
time

`$SECONDS` - no of seconds the shell was running  
for

`$EPOCHSECONDS`

`$EPOCHREALTIME` -  $10^{-6}$  microsecond resolution
