01.Array Expansion

Sunday, March 15, 2026 3:38 PM

printf '%s\n' text1 text2 - prints the text using the format specifier for each

→ for arrays : printf '%s\n' "${arr[@]}"

→ ${arr[@]:n:m} start at n, grab m elements

${arr[@]//char1/char2} find and replace

! " " and @ are mandatory
