02.Find command

Sunday, March 15, 2026 3:38 PM

find . display all files in current directory (+recur)

find . -type f find here only regular files

-type d find directories

-type l find symlinks

-name '*.txt'

-exec command {} to refer to the current file ';'

-print0 separate files by null bytes

& order of arguments matter

xargs command – batch the output as a whole and send it to the command

-0 separates files on null bytes (not new lines)
