03.Conditionals

Sunday, March 15, 2026 3:37 PM

" " allows for variable expansion
' ' do not allow for variable expansion
no quotes quick work
-f check if a specific path exist and is a regular file

While syntax

```
while [[cond]]; do
    body
done
```

Until syntax

```
until [[ cond ]]; do
    body
done
```

! if executes a command if provided instead of [[ ]], then it checks its exit code and executes the then segment if the exit code was 0

true and false are commands in bash that just return exit codes
